Education

Wilfred Laurier University

Sept 2024 - Present

Bachelor's Computer Science (BSc)

Waterloo, ON

- Gained a solid foundation in data structures, algorithms, and object-oriented programming through courses in Python, Java and C.
- Developed practical skills in database systems, software engineering, and computer organization, applying theory in labs and projects

Cameron Heights Collegiate Institute

Sept 2021 - June 2024

Ontario Secondary School Diploma (OSSD)

Kitchener, ON

- Completed Grade 11 and 12 Computer Science courses, gaining hands-on experience with Java and Python for problem-solving and application development
- Developed a strong academic background in Mathematics, Physics, and Chemistry, enhancing logical reasoning, quantitative analysis, and problem-solving skills
- Awarded the Ontario Scholar Certificate for academic excellence in Grade 12

Work Experience

Riipen

Feb 2026 - April 2026

Data Analyst

Remote

- Analyzed customer retention and engagement data by performing exploratory data analysis and cleaning datasets using Excel/Python/SQL, resulting in identification of key churn factors and improvement opportunities
- Collaborated with a team of 5 members by dividing analytical tasks and combining insights, resulting in a comprehensive, data-driven final report delivered to the client
- Designed and developed a web-based dashboard to visualize key metrics

WSP Canada

May 2025 - Aug 2025

Technology and Security Intern

Mississauga, ON

- Utilized Python, SQL, and Bash to automate routine tasks, perform data lookups, and analyze logs, reducing manual troubleshooting and processing time by ~20%.
- Supported IT infrastructure design initiatives and contributed to system and architecture documentation.
- Created and maintained technical documentation, process guides, and compliance materials.
- Collaborated with cross functional teams on technology and security projects to ensure timely delivery.

Technical Skills

Programming Languages: Python, SQL, C#, C++, Java, JavaScript, Swift, TypeScript, Bash, MATLAB, HTML, Lua

Frameworks & Tools: AWS, Polymer, Pandas, Jupyter, Azure, React.js, Git, Eclipse, VS Code, Visual Studio, Maple, IDA

Projects

StealthGPT | Developed and maintained a AI assistant desktop application using Electron, Node.js, and JavaScript, serving 100+ active users.
